

PRODUCT OVERVIEW

CRYSTAL

CRYSTAL 200 ACOUSTICAL GLASS WALL SYSTEMS

The Crystal 200 series is a double glazed acoustically rated full height glass wall system. Built using the 40 year time proven platform of a steel reinforced structural aluminum frame, the Crystal 200 series provides visual clarity as well as laboratory tested STC values in the mid 40's. It is available in single and paired panel configurations in standard heights up to 12'3" (3,7m) (higher upon special request - contact Moderco), a multitude of frame finishes including anodized or powder coated, and glass options such as acid etched, sand blasted, frosted, etched designs & custom applications in addition to clear see through. If privacy is a requirement, remote controlled internal electrically operated tilting horizontal blinds are available. Locking the panels in place without the need for floor bolts is made possible by mechanical top and bottom acoustic seals activated by a removable key, thus preventing unauthorized use. The Crystal 200 series is your only choice when it comes to an acoustical glass wall system.

SIGNATURE

SIGNATURE 800 OPERABLE PARTITION SYSTEMS

The Signature 800 series is a steel reinforced aluminum frame design and has been continuously manufactured and in continuous use throughout the world for over 40 years. Only Moderco manufactures this field proven mechanically assembled design in North America. Signature is available in single, paired or electrically operated continuously hinged configurations, each with many features and options. The standard panel height goes up to 33' (10m), while taller panels are available on a project to project basis. STC values range from the low 40's to the mid 50's and are available with all sound tests conducted in approved independent acoustical laboratories. The Signature 800 series is Moderco's premiere Operable Partition System providing the user with years of trouble free service.

EXCEL 700 OPERABLE PARTITION SYSTEMS

If a quality Operable Partition System at a competitive price is your objective, then the Excel 700 series is your solution. Moderco uses collaborative “cobots” - robots that work alongside and with humans to efficiently assemble Excel panels. Their combined skills and abilities enable Moderco to quickly & precisely assemble Excel panel systems at a lower price point while not compromising quality or delivery times. Each roll formed steel panel frame is fully welded using heavy gauge galvanized steel segments to which the trimless roll formed steel panel faces are also welded. The Excel 700 series is manufactured in single, paired or electrically operated continuously hinged configurations. Independently tested STC values from the low 40’s to the mid 50’s are offered. If your partition needs require proven field performance and durability combined with a competitive price, the Excel 700 series is exactly what you need.

VISION 100

SINGLE GLASS WALL SYSTEMS

The Vision 100 series creates physical separation, for example, in an open plan layout, but maintains the openness and desired joy of natural light. It is available in single and paired panel configurations and utilizes ½" (12,7mm) standard thick clear tempered glass, but is also available as tinted, colored, etched, sand blasted, acrylic or custom finishes. The standard horizontal rail finish is clear anodized with optional painted and anodized finishes available. Maximum standard height is 12' (3.7m) with standard panel widths of 48" (1,2m). Contact Moderco for special applications.

UNIFOLD

UNIFOLD ACCORDION DOORS

Unifold accordion doors are the best option when fast set-up & economical sight and sound separation is desired. STC values from 15 to 44 are available. The preferred internal pantograph design is our standard, providing solid structural integrity and limitations on over extension without the use of internal chains. Standard finishes are vinyl, vertical ribbed carpet and fabric. Maximum height is 12' 3" (3.7m) with maximum single door widths dependent on selected STC. Contact Moderco for your Accordion Door needs.
